

TOMASZ ANDRZEJCZYK

FRONT END DEVELOPER

ABOUT ME

I am a young engineer and programmer.

I am characterized by logical thinking, analytical mind and a highly developed technical sense. In development, I follow the principle "There is nothing that I cannot learn" I love to work out the mechanisms and take them apart.

I am looking for a job in a company where I can develop my skills, offering my commitment, motivation and constantly developing skills in return.

- CMS WordPress
- English (C1)

EDUCATION

Warsaw University of Life Sciences | 2018-2022

Forestry - finished studies with engineer degree.

Warsaw University of Technology | 2016-2018

Electric and Hybrid Vehicles Engineering

EXPERIENCE

I am currently working as a carpenter in my own business. At the same time, I am developing my skills as a programmer and freelance as a web developer.

I also have experience in telephone customer service and as a representative of two car rental companies.

Thanks to these experiences, I am able to work independently, and I also have experience in dealing with contractors.

EVOLUTION TYPESCRIPT BOOTCAMP | Jan - May 2023

I successfully graduated a Typescript Bootcamp organised by Evolution - the leading provider of live casino systems. There, under the supervision of experienced programmers I was improving my programming skills, TypeScript, React and many other tools, frameworks and libraries such like: Redux, MobX, WebGL, Pixi.js, Babylon.js.

BOOTCAMP FINAL PROJECT - 3D-SLOTS

<https://github.com/Andrzejczyk97/Evolution-course-work>

<https://3d-slots.surge.sh/>

This project was developed as a final project for the bootcamp. I used TypeScript, Babylon.js as a game core, for 3d graphics and sounds, Pixi.js for User Interface and Vite as a bundler. It's a 3d game where You can play on a slot machine. Find out more about game features on its GitHub page.

ANDRZEJCZYK-PORTFOLIO.SURGE.SH

On this page I present my skills, created pages and smaller projects in the field of TypeScript, JavaScript, HTML and CSS. It was created in React, using TypeScript. I invite you to familiarize yourself with the latest projects in "My projects" section.

ZDECHY.PL

Website created for the needs of my own business. The implementation included website design, HTML, CSS and JavaScript code. I used the Bootstrap framework to build the website.
